**Be part of our journey to enhance the efficiency of SMART Breeding!**

## **WORKING STUDENT / TRAINEE IN R&D (m/w/d for 20 h/week)**

SMARTtray® GmbH is a dynamic start-up revolutionizing plant breeding technology and services for plant breeding companies worldwide. Our mission is to automate and scale the SMART breeding process, providing our clients with cutting-edge solutions. We are seeking a motivated working student or trainee to help us expand our expertise in cultivating new crops and optimizing our SMARTtray® technology.

### **Your responsibilities:**

- Enhance our knowledge of cultivating and processing new crops using SMARTtray® technology.
- Assist in managing our Vertical Farm to optimize speed breeding recipes and advance plant breeding technologies.
- Support DNA extraction experiments in our in-house laboratory.
- Collaborate with customers on joint projects, ensuring careful and effective project management.

### **Your profile:**

- Passion for innovative plant breeding solutions
- Strong analytical skills with the ability to design, conduct, and evaluate experiments.
- Motivated and committed to being an integral part of our journey.
- Currently pursuing studies or training in agricultural sciences, plant biology, biotechnology, or a related field.
- Proactive problem-solver with a willingness to engage in team projects and discussions.
- Independent and goal-oriented, yet a true team player.
- Proficient in English and German.

### **We offer:**

- Engaging and diverse work in a forward-thinking start-up.
- Access to state-of-the-art facilities and equipment.
- Opportunities to contribute to the company's growth and process development.
- A dedicated and enthusiastic team environment.

**If this role excites you and matches your skills and experience, then we are looking forward receiving your application. Please send your documents to:**
